

ATTACHMENT B - MARKED-UP COPY

In the claims:

3. (Amended) A connector according to claim 1 [or claim 2], in which the plunger means included fibre-engaging resilient means.

5. (Amended) A connector according to [any preceding claim] claim 1, further including a ferrule at the front end, the ferrule carrying an optical fibre as a stub having a distal end flush with the front face of the ferrule and a proximal end extending from the rear face of the ferrule and terminating in an alignment tube coaxial with the channel means of the internal core member.

BEST AVAILABLE COPY

7. (Amended) A connector according to [any preceding claim] claim 1, in which the plunger means comprises a compression head which is directly activatable to reduce the volume of the chamber and apply pressure to the adhesive therein.

8. (Amended) A connector according to [any of claims 1 to 6] claim 1, in which the plunger means is indirectly activatable and comprises a compression head within the housing and a co-operating activation member which extends from the housing and which is manually movable to cause the compression head reduce the chamber volume.

10. (Amended) A connector according to [any preceding claim] claim 1, in which the plunger means includes means cooperable with the housing to maintain the compression head in the inner position.
